### **DIGEST AND PURPOSE**

Texas faces a difficult challenge to develop water policies that serve state, regional, rural, and urban water interests. The Texas Constitution authorizes the creation of groundwater conservation districts to plan, develop, and regulate the use of water. Currently, the area of Bastrop and Lee Counties is dependent on the waters of the Carrizo-Wilcox underground aquifer for most of its water supply. Although there are other surface water sources in and around these two counties, in this rural area the residents are highly dependent on well water for survival. The entire Carrizo-Wilcox aquifer is threatened by over production and potential pollution that may devastate the health, lifestyles, and economic well-being of every citizen in the region. As the population of these counties and the entire area grows, the dependence on and demand for water will continue to increase. H.B. 2432 ratifies the creation of the Lost Pines Groundwater Conservation District, subject to voter approval at a confirmation election, to manage the groundwater resources of Bastrop and Lee counties.

### **RULEMAKING AUTHORITY**

Rulemaking authority is expressly granted to the Lost Pines Groundwater Conservation District in SECTION 4 of this bill.
