AUTHOR'S/SPONSOR'S STATEMENT OF INTENT

The problem of underage and binge drinking in Mexico is a unique issue for communities along the southwest United States border. For many generations, border cities in Mexico have been destinations for youth for the purpose of tourism and evening entertainment. Differences in alcohol policies, the legal drinking age (18 years of age in Mexico and 21 years of age in the United States), and the standards and limitations of enforcement of United States and Mexico laws on alcohol consumption and public intoxication have contributed to significant public health and public safety problems on both sides of the international border.

H.B. 3426 requires the Department of State Health Services to establish a binational substance abuse task force to study various issues related to the abuse of substances and alcohol and submit a report to the governor and the legislature.

RULEMAKING AUTHORITY

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.
