### **AUTHOR'S / SPONSOR'S STATEMENT OF INTENT**

Municipal and county hospital authorities are authorized by law to construct and operate hospitals for the benefit of the public. The growing trend in health care is for hospitals to enter into joint ventures with physicians to own and operate ancillary health care facilities, such as day surgery centers or imaging centers. However, under current law, municipal and county hospitals authorities are not allowed to form or sponsor nonprofit corporations, making those hospitals less competitive.

H.B. 2168 authorizes hospital authorities and districts to use innovative methods to deliver health care services by allowing a district or an authority to create a nonprofit corporation and to own and operate an ancillary health care facility.

### **RULEMAKING AUTHORITY**

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.
