AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

Currently, the Texas Department of Agriculture (TDA) has a National Organic Standards accredited program to certify organic products. However, TDA does not have any program or activity that specifically monitors, promotes, or expands the organic industry in Texas. In 2005, organic food sales hit twenty billion dollars in the United States. Currently, Texas is not in the top 10 states in terms of organic production; however, there is an opportunity for Texas to expand the production of organic food in the state. The formation of an Organic Industry Advisory Board could assist TDA in supporting this industry.

H.B. 2345 creates a Texas Organic Industry Advisory Board at TDA.

RULEMAKING AUTHORITY

This bill does not expressly grant any additional rulemaking authority to any state officer, institution, or agency.
