### **AUTHOR'S / SPONSOR'S STATEMENT OF INTENT**

One of the new higher education goals in the 60x30TX plan for the state is that by 2030 student debt not exceed 60 percent of first-year wages for graduates of Texas' public institutions. To attain this goal, students must be well informed on their student debt and understand the short-term and long-term implications of it.

S.B. 887 requires institutions of higher education to annually provide each student with certain information concerning the student's education loans, including the amount borrowed to date and estimated future loan payments. Additionally, this bill would require institutions collaborate to foster innovative practices for communicating this information to students, such as, but not limited to, a mobile app. (Original Author's / Sponsor's Statement of Intent)

S.B. 887 amends current law relating to a requirement that certain participating institutions under the student loan program administered by the Texas Higher Education Coordinating Board provide loan debt information to certain students.
